PREVENTING COVID-19 CROSS-CONTAMINATION

General Tips

Always perform hand hygiene

Keep hands away from face and limit surfaces touched

Avoid using personal devices in clinical areas

Avoid wearing jewelry under PPE

Do not wear cosmetic makeup if re-using PPE

in common areas

NYC

HEALTH+ HOSPITALS

waste in waste container (could aerosolize contaminants)

During/After Patient Care Activities

Always perform hand hygiene

Ensure a tight seal on N95 respirator

Ensure good fit for all facemasks

Limit touching surfaces in patient care area

Do not readjust **PPE** in patient care area

based precautions for COVID-19

Doff any contaminated PPE and dispose appropriately

Taking Breaks

Always perform hand hygiene

Disinfect common surfaces with disinfectant wipes

Facemasks only can be brought into breakroom. Store away from food/ beverage. Keep mask on when not eating or drinking.

Do not wear other PPE or bring patient care items to break room

Equipment

Use disposable equipment/ supplies when possible

If re-using equipment. disinfect between each patient

Disinfect with wipe before you type
