

## Infection Prevention and Control COVID-19 Education

This module meets the Occupational Safety and Health Administration (OSHA) Healthcare Emergency Temporary Standard.

All staff are required to complete this training by March 7, 2022!

### This module will:

- Provide an overview of the SARS-CoV-2 virus that causes COVID-19.
- Review hand hygiene and respiratory etiquette.
- Distinguish the various types of Person Protective Equipment (PPE).
- Describe standard precautions and transmission-based precautions.
- Review COVID-19 PPE guidance and donning and doffing procedures.
- Define cleaning and disinfection.
- Identify strategies to maintain workplace safety.
- Outline the importance of vaccination.
- Review guidance and policies.

**Training Duration: Approximately 21 minutes**
